

15 Aug audit — close the last 3%

Task force: Pavi · Arun Kumar · Tejas. **Start 10:00 AM at the stores office. Six jobs, roughly half a day.** Everything else is uploaded or ready — these jobs close the open points. Write answers in the last column. Suggested split: Pavi takes Jobs 1 & 4, Arun takes Jobs 2 & 6, Tejas takes Jobs 3 & 5. Send everything back in one message when done.

Rulings already made (14 Aug evening, no action needed): QC Pending uploads as TOP-UP on the existing ERP balance, never a flush. Rejection Zone and QC Rejection are the same area — files sum together. Obsolete & Scrap upload 'just in case' into new warehouse 'Obsolete - EE'; material moves out via issues when physically removed.

JOB 1 — BTMS, 20 minutes (Pavi). The single most important check.

#	Do this	Write here
1	HRR 6CL3S1: open pallet P0157. Count P0010487-A inside. Is it really 47?	
2	HRR 6CL3S2: open pallet P0061. Count. Is it 47, or is the same ERP figure written on both pallets?	
3	Confirm the fourteen 2-unit BTMS pallets are distinct pallets (P0153/154/155/156/282/284/068/032/182/230/198/084/231/191 + QC-hold P0192/106/232/233/234).	

JOB 2 — Code hunt, ~1 hour (Arun). 30k units are held only because these labels were mis-copied.
